Profile

AI engineer with 17 years of software engineering across front end, back end and mobile. I build AI that takes real actions inside products and company tools: assistants that act on behalf of users, AI that reads documents and turns speech into structured data, and agents that work with permissions, approvals and an audit trail. Lead roles in Germany and Ukraine, VP of Engineering, and most recently five and a half years at Swiftlane as lead engineer on its AI-powered operations product.

Education

Applied Mathematics faculty. Specialist degree.
Yuriy Fedkovych Chernivtsi National University, 2004 – 2009.

Languages

Ukrainian – native
English – advanced

Strengths

- Builds AI that acts safely in production: agents, LLM features, approvals, fallbacks
- Brings AI-first development workflows to engineering teams
- Leads teams: hiring, mentoring, technical specs, strategy
- Automates aggressively: replaces manual processes with AI pipelines and workflows
- Ships end to end: front end, back end and mobile
- Self-driven, delivers under pressure and meets deadlines

Skills

TECHNOLOGY	LEVEL	YEARS USED
AI agents & LLM features (Claude, OpenAI, MCP, RAG, voice AI)	Professional	2
AI-assisted development (Claude Code, Copilot, Cursor)	Professional	2
AI-assisted development process for teams (workflows, standards)	Professional	2
AI process automation (n8n, Zapier, engineering & business workflows)	Professional	2
JavaScript / TypeScript	Professional	11
React, Redux, Saga, MobX	Professional	7
Node.js, Express	Professional	4
Flutter / Dart	Good	1
React Native	Very Good	3
Vue.js	Very Good	3
HTML5 / CSS3, Sass / Less	Professional	12
REST APIs, JSON	Professional	11
Git	Professional	8

Also experienced with: jQuery, Backbone, Angular.js, Webpack, WordPress, Bootstrap, Google Maps.

Experience

Independent AI Engineer, Self-employed · Remote; Oct 2026 – present

Independent engineering for companies adding AI to their products and operations.

- AI agents that work inside company tools, with permissions, approvals and an audit trail
- LLM features in existing products: assistants, document understanding, voice input
- Workflow automation with AI steps, in n8n or code, with monitoring and safe retries
- AI-assisted development process for engineering teams

Senior Full-stack & AI Engineer, Swiftlane · Remote; Feb 2021 – Sep 2026

Lead engineer on an AI-powered operations product across web, mobile and voice.

- Shipped voice and chat assistants that act on behalf of users, AI document reading and speech-to-form input
- Designed the safety model for AI actions: server-side confirmation, deterministic fallbacks, regression testing on real conversations
- Introduced an AI-assisted development process: written task contracts, risk-based model selection, proof-based code review
- Before that, lead engineer on the main web platform and mobile app

React · TypeScript · Node.js · Flutter · Python · PostgreSQL · Google Cloud

Senior Team Lead, front-end, American Outlets · Freelance; Apr 2020 – Feb 2021

VP of Engineering, Relevant Software · Lviv; Nov 2019 – Mar 2020

Team Lead / Senior Frontend Developer, Freelance · Chernivtsi; Sep 2018 – Nov 2019

Lead Front-end Developer, A.T.U Auto-Teile-Unger · Berlin; Aug 2016 – Aug 2018

React, Redux, Webpack, unit tests, React Native, JavaScript, HTML5, CSS3.

Senior Front-end Developer, Édition Lingerie · Berlin; Mar 2016 – Jul 2016

React, Redux, Flux, Immutable, Material-UI, Less, HTML5, Webpack.

JavaScript Development, RebelMouse · Remote; Mar 2015 – Feb 2016

JavaScript, Backbone.js, Mustache, Underscore.js.

Senior JavaScript Developer, Svitla Systems · Kyiv; Oct 2013 – Mar 2015

JavaScript, jQuery plugins, Underscore templating, Google Maps.

FED Team Lead Developer, Svitla Systems · Ukraine; Nov 2012 – Sep 2013

jQuery, JavaScript, WordPress, XHTML, HTML5, CSS3, Sass, Less, responsive design, Ajax, JSON, XML, PHP.

Senior Front End Developer, Tacme · Dubai; Aug 2012 – Nov 2012

Standards-compliant web pages (HTML, XHTML, CSS, JavaScript, jQuery), JSON, XML and Ajax, RTL for Arabic, email newsletters, mobile websites, Google Maps.

Senior Front End Developer, Svitla Systems · Ukraine; Sep 2011 – Aug 2012

Standards-compliant web pages (HTML, XHTML, CSS, JavaScript, jQuery, Ajax), Facebook pages (FBML), email newsletters, WordPress and Joomla integration (PHP & MySQL), mobile websites.

Middle Front End Developer, OSF Global Services · Ukraine; Apr 2010 – Sep 2011

Web page templates from wireframes in clean, semantic HTML and CSS for a complex e-commerce application; cross-browser support; close work with designers, marketing and developers.

Junior Front End Developer, It Group; Jul 2009 – Apr 2010

Standards-compliant web pages (HTML, XHTML, CSS, JavaScript, jQuery), email newsletters.
