CUSTOM AGENTS

5 custom agents every dev team can use.

One job each. Few permissions. A clear report.

Dmytro Shved · Independent AI Engineer

01

Code reviewer

Reads the changes and finds real problems.

> **Can touch:** read only.
> **Reports:** each problem with proof: the failing case or exact steps.

02

Test runner

Runs the tests and tells you what failed.

> **Can touch:** run commands only.
> **Reports:** pass or fail, and the failing tests word for word.
> Never fixes.

03

Docs researcher

Answers questions from the docs and the code.

> **Can touch:** read and search.
> **Reports:** the answer and the source it came from.

04

Release notes writer

Turns this week's changes into plain words.

> **Can touch:** read the change history.
> **Reports:** short notes users understand. No jargon.

05

Codebase guide

Explains any part of the code to a newcomer.

> **Can touch:** read only.
> **Reports:** a plain explanation and where to start reading.

Dmytro Shved · Independent AI Engineer

Narrow job.
Few permissions. A clear report.

Start with one. Add the second when you miss it.
